

## **BARTON MALOW CONSTRUCTION – [www.bartonmalow.com](http://www.bartonmalow.com)**

### **Experienced**

Founded in 1924, Barton Malow provides construction services nationwide. Our market focus includes wastewater, health care, stadiums, education, energy and corporate/industrial facilities and allows us to develop a high level of expertise in the markets we serve. Our Preconstruction Group, staffed with full-time engineers and architects, supports these groups with a reliable estimating system. Their expertise also includes all facets of project planning and manpower planning.

### **Design/Build Expertise**

Barton Malow Company – planners, architects, technical staff and builders – has managed design-build projects for 20 years. We offer a full range of services, predesign through occupancy. The single point of accountability is in fact a single firm. All told, the company served as leader on more than 200 design-build projects, ranging from \$2 million to \$220 million.

Four times, the Design-Build Institute of America conferred awards upon Barton Malow: for the West Suburban Medical Center for Primary Care, River Forest, IL; the American Concrete Institute headquarters, Farmington Hills, MI; Barton Malow's own headquarters in Southfield, MI; and the General Motors Global V6 Engine Facility in Flint, MI.

Our staff is active in the DBIA, currently serving in leadership roles, and authoring “how-to” articles, aimed at designers, engineers and constructors. In addition, Barton Malow leaders collaborated on a handbook of best design-build practices, currently in use at the company.

### **Customer Service**

Customer service is our passion! We have a formal customer satisfaction program in place and are ISO-9001:2000 certified. Our focus is on solid performance, building relationships and maintaining them. Historically, 78% of our work comes from repeat clients. They know we'll get the job done right the first time – in a fair and ethical manner.

### **Safety Excellence**

Barton Malow's long-established safety performance plays a large role in the company's high success rate and reputation for quality service. Thanks to a comprehensive and aggressive safety and loss control program, our clients, as well as safety and insurance groups, have repeatedly recognized Barton Malow for safety performance consistently superior to the industry norm.

Our clients know that we understand the importance of quality safety procedures to ensure healthy environments that protect our clients, our staff, and the public around Barton Malow jobsites.

### **Wastewater**

Barton Malow specializes in all aspects of wastewater treatment facility work, from the influent to the effluent. We provide efficient services for the construction and expansion of wastewater treatment facilities and install wastewater treatment equipment used in the preliminary, primary, secondary, and final stages of wastewater management.

### **Storm Water**

We are also involved in the influent and effluent areas of the storm water treatment, wastewater treatment, and overflow retention market in an effort to reduce runoff pollutants from storm and wastewater. Barton Malow provides the service necessary to ensure quality treatment of community storm and wastewater.

### **Drinking Water**

We manage and build water treatment facilities to provide communities with sanitary drinking water. We construct storage, pumping, and treatment facilities, collecting water from sources such as wells and lakes, cleaning it, and pumping it back out again for consumption.

### **Full Service Civil Works Expertise**

Through design-build, construction management, engineering, procurement/construction (EPC), or general contracting, our Energy & Environmental Group specializes in:

- Water and wastewater treatment plants
- Pump stations
- Combined Sewer Overflow (CSO) facilities
- Parking Structures
- Civil Work for Heavy Industrial Facilities
